Prototype of virtual ID for first level students of the Universidad de las Fuerzas Armadas "ESPE"

Problem

Why do we need a virtual ID?

- Services and Benefits → (Integrated Health System)
- Virtual ID System
- Avoid Contagious Situations

Overview

- Design a prototype of virtual identification system, for this we adopt new technologies as innovation or necessity
- The prototype is aimed at new students who did not obtain the benefit of having a physical card

Background

- The computer technologies allow users improve processes that were previously carried out manually.
- It is important that students have their own identification
- This system will have a database.

Structure of the institutional ID
